WYTWÓRCZA SPÓŁDZIELNIA PRACY „SPOŁEM”

Mielczarskiego 93-95,
25-726 Kielce, Poland
Marketing Department
tel. +48 (41) 347 98 00
sekretariat@wspspolem.com.pl

Wytwórcza Spółdzielnia Pracy "Społem" is a Polish company with over 100 years of experience. The second manufacturer of mayonnaise in Poland, one of the largest manufacturers of mustard, a major exporter of food to the markets of eastern and southern Europe is, contrary to appearances, not a subsidiary of an international concern, but of the Kielce Cooperative. Under this inconspicuous name is hidden a modern, profitable and dynamically managed enterprise, competing as equals with world giants.

Currently Wytwórcza Spółdzielnia Pracy "Społem" in Kielce produces the well-known **Kielecki Mayonnaise**, which has been on the market for sixty years, mustards and spirit vinegar produced since the pre-war period, as well as ketchup, sauces, spirit vinegar and SNACK - Przymak Świętokrzyski (semi-finished crisps for self-preparation). **Kielecki mayonnaise** is the strongest brand in WSP "Społem". Loved and recognized not only in Poland, but also abroad. By some consumers it is even considered a cult. It is also a specialty that enjoys the great trust of experts, as evidenced by numerous industry awards, distinctions and quality marks.

ACTIVTEK

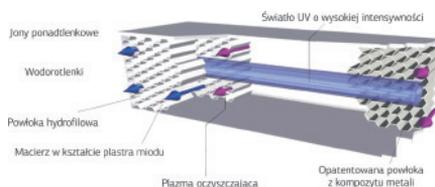

K. Olszewskiego 21
25-663 Kielce, Poland
tel. +48 (41) 307 06 00
biuro@activtek.pl

ActivTek has been operating in the global market for nearly 15 years. The company specializes in production and distribution of air purification devices, operating based on the advanced technologies. The company has its branches around the world. On the Polish market, the devices of ActivTek debuted in 2010. Since then, the number of their users has been increasing.

ActivTek brand's success is mainly owed to RCI ActivePure® technology, which the manufacturer uses in its devices. The Radial Catalytic Ionization (RCI ActivePure® Technology) - such this technology is called - was created by the experts working with NASA within the space flight program and now represents the peak of engineering solutions, today used to clean air in the spacecrafts. ActivTek had held the technology of RCI ActivePure® since 2004. Since then, all devices have also been certified by the Space Foundation, awarded for utility, created by adapting solutions used in space.

RCI ActivePure®- Radiant Catalytic Ionization Technology

Activtek's systems have a positive reputation in the medical community. RCI ActivePure® technology is certified to allow systems to be used in hospitals, among others. It also has a positive opinion from the Chief Sanitary Inspector in Poland.

Ten years since the debut of systems based on ActivePure® RCI technology, Activtek has faced the challenge of the worldwide fight against the SARS-CoV-2 virus and the disease entity called "Covid-19." Activtek has test results from an FDA (U.S. Food and Drug Administration) accredited laboratory showing that the use of Radiation Catalytic Ionization (RCI) technology reduces the number of infectious particles of the SARS-CoV-2 virus in the air by more than 99.9%.

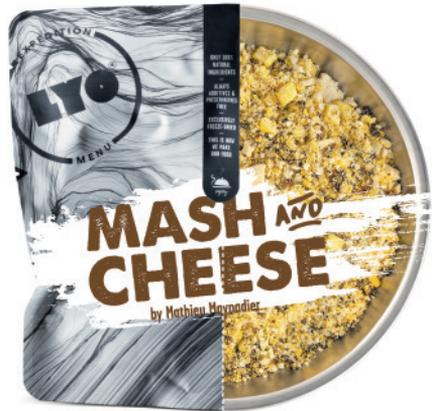

LYOFOOD

K. Olszewskiego 21
25-663 Kielce, Poland
tel. +48 (41) 300 59 73
info@lyofood.com

LYOFOOD's high-quality freeze-dried meals and snacks are made only from natural ingredients and without a gram of preservatives. The modern technology used by the company allows the meals to be stored for a long time while preserving their original nutritional value.

LYO

LYOFOOD is food prepared with attention to every detail. The company uses fruits, herbs and spices from its own fields, and buys other ingredients from trusted suppliers. The menu includes both classic offerings and allergen-free dishes. Some of the products have an EU organic production certificate. Meals from the Kielce manufacturer perform well in extreme conditions, thanks to which they have gained recognition from world-famous climbers, sailors and travelers, among others.

VIVE TEXTILE RECYCLING SP. Z O.O.

K. Olszewskiego 6,
25-663 Kielce, Poland
tel. +48 727 670 641,
tel. +48 788 957 397
salesvi@vive.com.pl

The company is committed to finding innovative technologies and solutions to enable 100% recycling of textiles. As part of its activities, it conducts research to produce new products from recycled textile fibers through various processes. The company is a producer of the innovative VIVE Texcellence material, a modern substitute for wood used in construction.

Products made of this composite can be used to build bridges, forest paths, beach entrances, terraces, boardwalks, bands to

VIVE TEXCELLENCE

protect the banks of seas, rivers, lakes and canals, as well as to protect dunes and cliffs.

The material can be processed with all common mechanical equipment and is safe to install, even under extreme conditions. It has high chemical resistance to oils, fats, acids and salts. All the properties of VIVE Texcellence products allow its use outdoors, wherever natural wood is used, and its durability will save costs in the future.

BALKER SP. Z O.O.

K. Olszewskiego 6 25-953 Kielce
tel. (+48) 570 570 273
e-mail: info@balker.pl

Balker is a company with many years of experience in the construction of single-family houses in Poland and abroad. The company creates solid, practical and energy-saving solutions. It focuses on renewable energy sources, thus caring for the environment. In return, investors can enjoy low operating costs.

The complete house is manufactured from natural, certified materials in protected conditions and is shipped for assembly at the time of obtaining the building permit.

The entire process from signing the contract takes about 3 months and the assembly of the house itself takes a maximum of 7 days.

Advantages of houses:

- assembled at any time of the year,
- predictable price and construction time,
- low operating costs,
- solid, practical and energy-saving solutions,
- 16 years of experience in the construction of single-family houses in Poland and abroad,
- assembly and transport in Poland included in the price of the house.

REGIOPLUS TOMASZ KIEK

ul. Wesofa 40, 25-305 Kielce
tel. (+48) 693 059 576
e-mail: ftc@interia.pl

Regioplus invented the brand Feel the City and is a family business, founded in 2020 by a married couple, Katarzyna Hodurek-Kiek and Tomasz Kiek. From the combination of their common interests, passion for Kielce and the region, a brand was created that promotes local culture, nature and Świętokrzyskie traditions. The company's slogan is - Feel the space that surrounds you! Our way, your way.

Katarzyna is from Kielce and Tomasz comes from Silesia. They are passionate about culture, art, design and street art. They also love traveling and discovering new interesting places with a climate. They also look for inspiration in places well known to them and close to their hearts.

Feel the City

Thanks to Kielce inspirations, based on the local history and tradition, created brand uses timeless design and symbols of Kielce, such as Kielecki Mayonnaise, Frania washing machine or UFO-shaped bus station.

The creators appreciate high-quality goods and the idea of sustainable production as well as timeless design. All products are designed by the owners and their production is entrusted to local manufacturers.

4 ECO SP. Z O.O.

Pl. Niepodległości 1, 25-506 Kielce
tel. (+48) 533 012 231
e-mail: biuro@4-eco.pl

4 ECO is a brand that has dynamically entered the renewable energy market, becoming its undisputed leader. It is one of the largest companies in the country that deals with the distribution and installation of photovoltaics and heat sources. The company was founded in Kielce and its head office is also located in the city. There are already 49 branches located all over Poland and the number of them is systematically increasing.

The company's offer is addressed to both individual clients as well as business and institutions. It includes, among others: heating mats, heat pumps, including the proprietary HEATECO pump, ventilation; photovoltaic farms are built and the exclusive PS Coat insulation system.

PSCoat is a coating that looks like ordinary paint, which is able to effectively protect the building against fire, mold, moisture, heat loss and corrosion. Therefore, in this range it gains an advantage over polystyrene. It is a modern look at thermal insulation. PSCoat uses quartz microspheres with a vacuum inside to isolate objects that reflect the sun's rays like a mirror. In the microspheres, which resemble small balls, there is a vacuum which is an excellent insulator. The PSCoat application is extremely simple to implement.

Therefore, isolation using it takes much less time than with traditional methods. A layer not exceeding one millimeter will effectively replace traditional polystyrene. PSCoat can be used on all types of building surfaces, such as: mineral plasters, acrylic plasters, polystyrene or directly on bricks, while maintaining the original appearance of the building. It allows you to insulate walls, e.g. in historic buildings with reliefs or with decorative balconies, without visible changes.

The 4 Eco team consists of people with passion, open to development and innovation. By providing the tools necessary for work, support at every stage, the partner gains comfortable conditions for business development and achieving satisfactory financial profits. Having 75 qualified, own assembly teams ensures that orders are carried out on time, which affects the quality and competitiveness against other companies.

By choosing 4 ECO products and services, customers contribute to the protection of the environment, as all offered solutions are fully ecological.

CREOCONCEPT

TOMASZ RYBKA

ul. K. Olszewskiego 19C, 25-663 Kielce
tel: (+48 41) 278 72 33
e-mail: biuro@creoconcept.pl

CreoConcept deals with the delivery and assembly of systemic partition walls used for modern and aesthetic division of open space. Its offer includes glass walls - single and double glazed in the mullion and non-mullion system. In addition, it offers mobile walls for conference rooms and glass walls with fire insulation.

The company creates office interiors that combine high quality standards and a unique look. Inspiration comes from the unique world of design, providing solutions in line with the latest trends. High quality is not a coincidence - it is determined by people who are driven by passion in their actions. Using the most modern aluminum and glass systems,

structures with high acoustics and incredible transparency are created.

A properly arranged office is the key to the well-being of employees and creative work. Thanks to CreoConcept products, created space inspires and stimulates action, becoming a place where people stay and work with pleasure.

Cooperation with the best architects allows the company to see and experience more, which translates into unique projects.

CreoConcept has 11 years of experience in creating and delivering the elements necessary for a modern office space. Each project offers a wide range of possibilities to create an exceptional workplace.
